

TruVision[®] Navigator

Unified video, access control,
intrusion and network management
security solution.

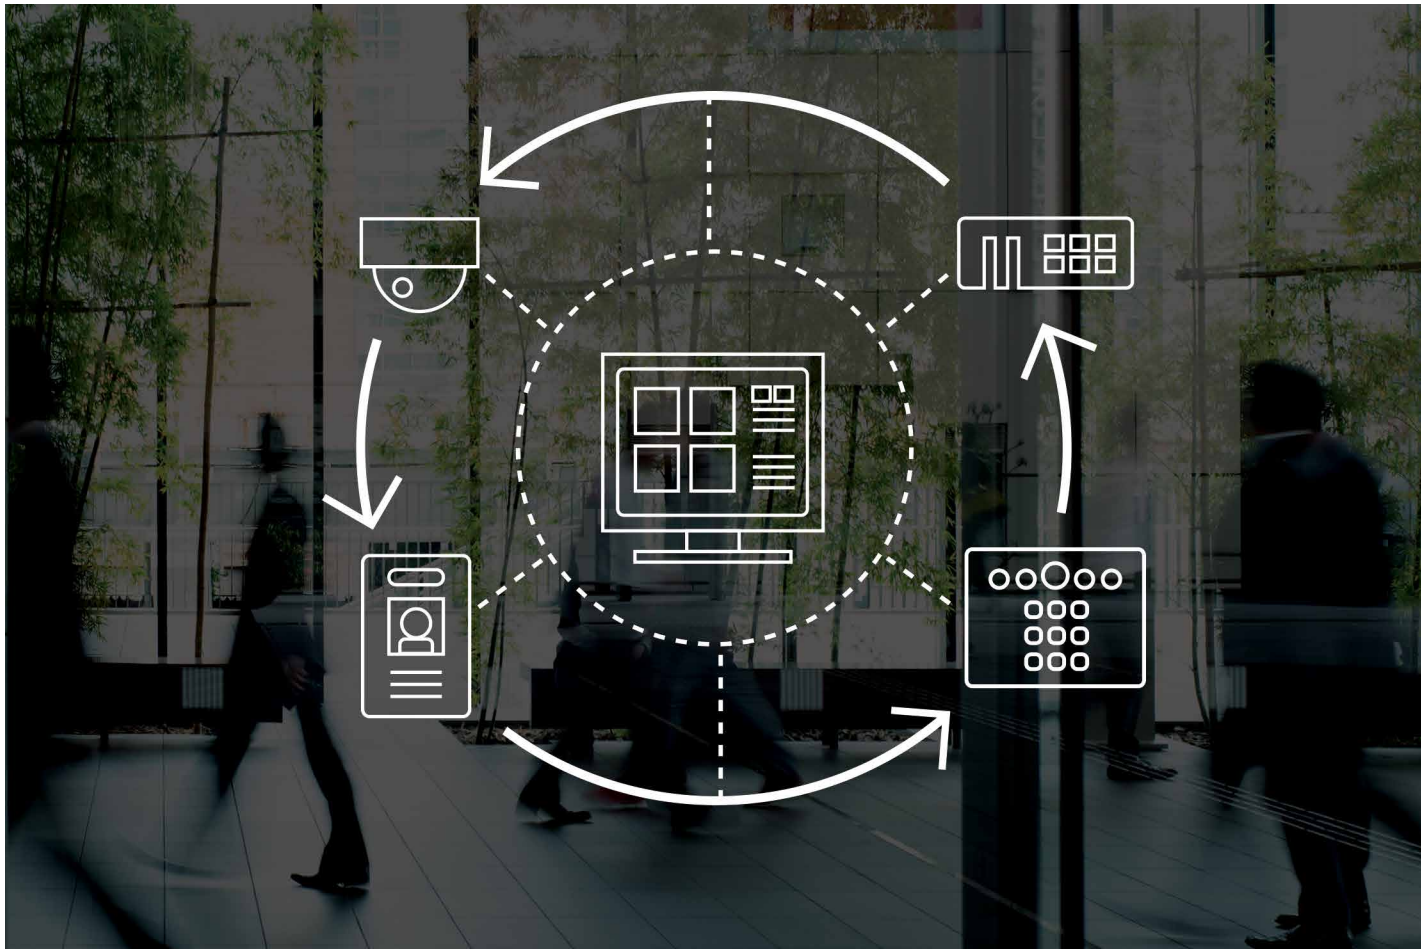

United Technologies

More than just video management

Intuitive. Powerful. Integrated.

TruVision® Navigator takes Interlogix integration to the next level. More than just video management software, TruVision Navigator now brings Interlogix commercial offerings—video, access control, intrusion and networking—together as one integrated solution.

One solution for multiple applications

Ideal for small to mid-size applications, TruVision Navigator provides powerful centralized and remote management capabilities, so you can manage every aspect of your Interlogix-based security system, easily and effectively.

Robust capabilities simplify operations

Feature-rich and easy to use, TruVision Navigator helps to streamline operations in high-volume installations, providing practical and reliable surveillance, even in challenging environments.

Expands to meet your needs

TruVision Navigator is a fully scalable solution that can be used as a standalone application, or deployed in a server/client environment.

A high-quality and affordable solution

With no service or maintenance agreements, TruVision Navigator is a reasonable, yet robust commercial security solution. By integrating TruVision video, TruPortal™ access control, UltraSync® intrusion and IFS® network switches, TruVision Navigator provides an enhanced situational awareness environment via a unified security solution.

Operator-Friendly User Interface

TruVision® Navigator brings together TruVision video, TruPortal™ access control, UltraSync® intrusion and IFS® network switches into one complete interface.

Device Tree

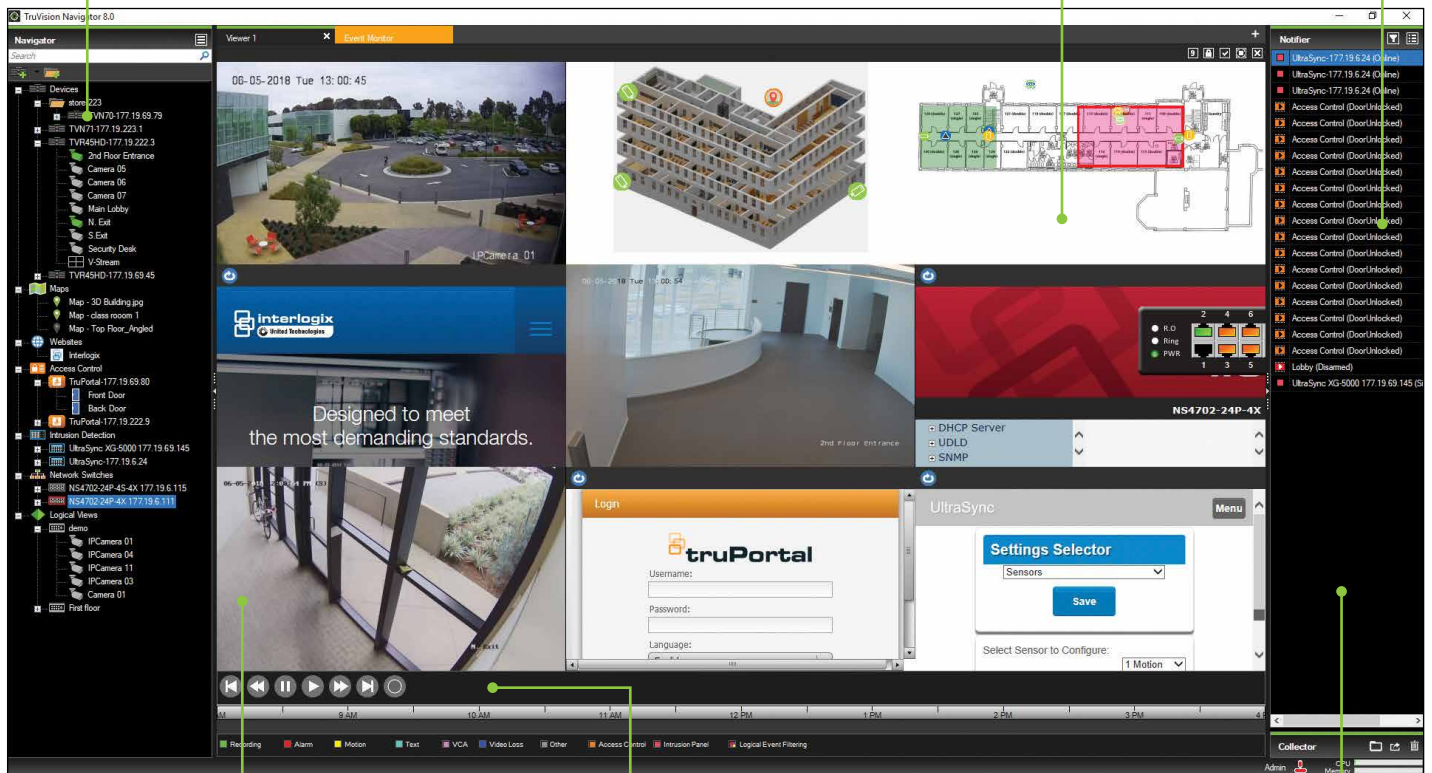

Provides quick access to TruVision video cameras and recorders, TruPortal access control, UltraSync intrusion and IFS network switches.

Facility/Campus Maps

Import facility/campus maps and place cameras, access control doors, and intrusion sensors on maps. Easily embed maps within maps.

Notifier

Provides real-time, color-coded video event notification of TruPortal and UltraSync alarm events.

Viewer

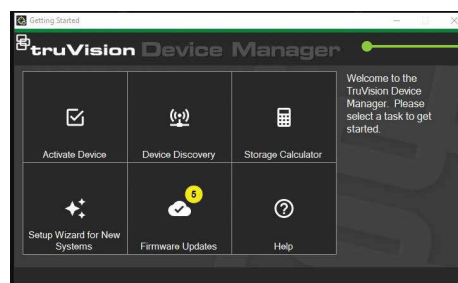

View live and recorded video with up to 10 detachable video viewing tabs allows you to create a virtual video wall. The pop-up event monitor window provides live video during an alarm. Users can easily setup individual video viewing tiles for sequencing of multiple cameras for easy monitoring.

Video Playback Controls

Easily play, pause, rewind and bookmark video recordings with controls and timeline.

Collector

Acts as a holding repository for video segments, snapshots and local recordings ready for export.

Built-in Device Manager

Easy wizard based tool to easily activate and set-up your system. Perform global password changes and automatically notifies you of firmware updates on all your networked TruVision devices.

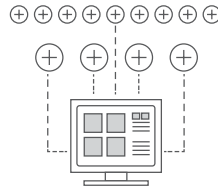

Feature rich for improved functionality.

TruVision® Navigator 8 provides added convenience and improved functionality to the TruVision platform. Easy to install and maintain, the updated software delivers a unified video, access control, commercial intrusion and network switch integrated solution designed to streamline operations for commercial security applications.

User-friendly interface

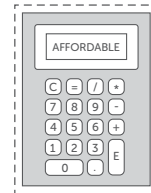

TruVision Navigator 8 brings together video monitoring, TruPortal™ access control, UltraSync® intrusion, and IFS® network switches into one centralized interface. Robust and easy to use, the software's key features include up to 10 video tabs, custom views, facility/campus maps, live event monitoring, video playback and 360° camera de-warping.

Scalable and compatible

TruVision Navigator 8 is a 64-bit application with GPU support offering high performance on a properly equipped computer. The application is also a fully scalable solution that can be used as a standalone application, or deployed in a server/ client environment.

TruVision Navigator 8 also supports integration with other Interlogix hardware platforms such as TruPortal access control, UltraSync intrusion and IFS network switches.

High-quality and affordable

Available with no annual fee and no software maintenance agreements, TruVision Navigator 8 is an easy-to-use, yet robust, commercial security solution*.

Advanced Features

Easily customize TruVision Navigator with logical views and logical event filtering. Integrate TruPortal access control, UltraSync intrusion with TruVision video and link cameras to doors and sensors/areas to receive event notifications with video verification. Quickly discover devices on a local Ethernet/IP network with the built-in device manager tool.

*Hardware for TruVision Navigator is sold separately.

Helping ensure your business is prepared for whatever comes next.

Interlogix provides global security and life safety solutions for both commercial and residential applications—helping customers secure and protect what matters most. Interlogix is part of UTC Climate, Controls and Security, the leading provider of heating, air conditioning and refrigeration systems, building controls and automation, and fire and security solutions.
