FEATURES

MOTION MONITORING

The sensor can detect and constantly monitor dynamic movement from the object within its detection range.

STATIC DETECTION

The sensor can detect if a person is stationary or sitting within 0.5 seconds. This means you do not need constant movement for the sensor to detect your presence.

SENSITIVITY

The sensor's detection sensitivity can be adjusted on the app to suit your preferences. This can also adjust the detection distance for standing and sitting situations.

SCENE CONTROL

Walk into a room and achieve smart home automation using the sensor's detection as a trigger point.

DELAYED RESPONSE TIMER

Set and adjust the detection reporting time on the app to allow a delayed timeframe to smoothly action your desired automated scene.

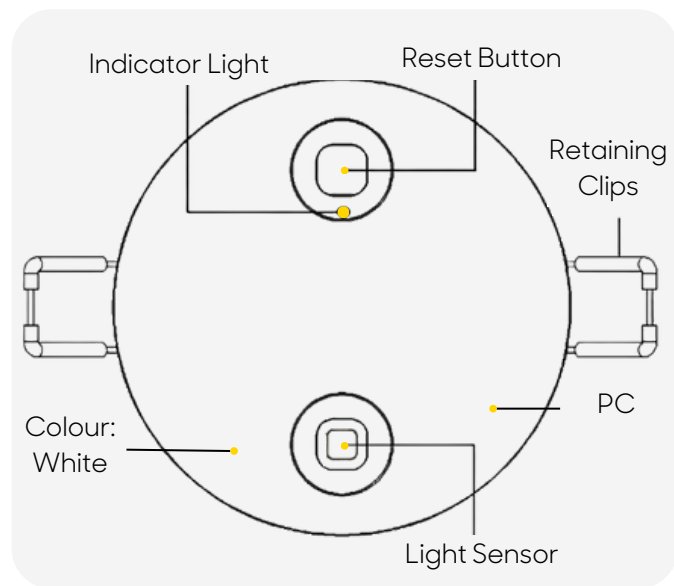

OTA UPDATE

Receive the latest firmware notifications and update using the app.
